Ohio University / 3.1 GPA

Graphic Design Major

Marketing Minor

Google Digital Garage Certificate

Content Marketing Certificate

## technical skills

Adobe creative suite

(Id, Ai, Ps, Xd, Lr, Ae)

HTML

CSS

Javascript

JQuery

Node.js

MS Word, Excel & PowerPoint

## skills

- Experienced with critical analysis and peer discussion.
- Excellent written and verbal communication skills.
- Using creative process to make decisions that best suit the needs of the customer and over all design.
- Thoroughly versed in aspects of marketing and sales to increase communication when working with other departments or companies.

## projects

### BREWFINDER

(HTML/Javascript)

Brewfinder is a simple application that returns a list of local breweries based on a user's zipcode. The brewery listings include name, type, address, phone, and website (if available). Additionally, an image from the brewery's website appears with the brewery listing to help familiarize the user with the brewery's brand, products, or experience. Lastly, users are able to "favorite" breweries to add to a crowd sourced list of favorites! Two API's were used to create this application: Open Brewery BD and LinkPreview.

### Random Password Generator

(HTML/Javascript)

Project goal was to output a random password based on user input. Users must answer a series of alert messages to determine the characters used in their randomly generated password. Once users confirm or deny each alert, a random password will be generated and displayed below.
